

Behaviors: Always Stay Prepared in Case of Emergency

Why?

A well-structured emergency action plan prioritizes the safety and well-being of employees, minimizing the risk of injuries during emergencies.

What?

- ✓ **Life-Saving:** Being prepared can mean the difference between life and death.
- ✓ **Having a plan and knowing what to do in an emergency** can help you and your team stay safe.
- ✓ **Minimizing Impact:** Proper preparation can reduce the severity of the impact of disasters.
- ✓ **Reducing Fear and Anxiety:** Knowing that you have a plan in place can reduce the fear and anxiety associated with potential emergencies. This can help you stay calm and make better decisions during a crisis.
- ✓ **Preventing Further Damage:** Emergency preparedness can help prevent additional damage. For instance, knowing how to shut off utilities like gas and electricity can prevent fires or explosions during a disaster.

Questions

Open-ended questions

- What things can we do to improve our emergency response? Practice, Training.
- How is the emergency plan activated on site?
- Do you know what to do if the fire alarm sounds?
- What are the most common types of emergencies we might face at work?

Experience-based questions

- Have you ever been in an emergency situation at work? What happened, and how did you react?
- Can you recall a time when emergency training or a drill helped you feel more prepared?
- Have you ever seen a situation where emergency procedures were not followed correctly? What were the consequences?

What would you do?-questions

- If a co-worker starts panicking during an emergency, how would you help them stay safe?
- You witness a fire breaking out in a nearby area. What steps should you take immediately?
- If an emergency exit is blocked during an evacuation, what alternative actions should you take?

Spot the improvement-questions

- Are there any emergency procedures that could be made clearer or more accessible for employees?
